

## GOOD ROADS DAY TO BE OBSERVED HERE ON MONDAY

Plans Ready and City Divided into Districts to Aid in Securing Signers to Two Initiative Petitions

Monday will be "State Good Roads Day" in Phoenix when all favoring a state highway commission who have not already done so will be expected to sign the necessary initiative petitions so that the measure can be put to the vote of the electors at the fall election. Those signing the highway commission bill petition will also sign a petition for a constitutional amendment which will make possible the operation of the state highway commission.

County Chairman Dobbins of the Arizona Good Roads association held a final conference with workers late Saturday afternoon. Those present were principal members of the Merchants and Manufacturers association, the Rotary club, the Kiwanis club, the Arizona Automobile Dealers' association and the Maricopa County Real Estate board.

It was decided that the Merchants and Manufacturers' association will take charge of booths and that each of the other public spirited organizations take a ward under the old city plan. The Adams hotel ward, north of Washington street and east of Central avenue, in consequence, was assigned the Rotary club; the Chamber of Commerce ward, north of Washington street and west of Central avenue, to the Kiwanis club; the City Hall ward, south of Washington street and east of Central avenue, to the Real Estate board, and the Court House ward, south of Washington street and west of Central avenue, to the Automobile Dealers' association.

The Merchants and Manufacturers' booths will be placed at the postoffice, school administration building, Central drug store, Strand theater, Carl Anderson's office, city railroad ticket office, New York store, Adams hotel, Donofrio's, Owl drug corner, Fleming building, Goodrich building, National Bank of Arizona building, Y. M. C. A., all

banks, Y. W. C. A., and Commercial hotel.

## FIND MONTANA KNOWS MORE ABOUT ARIZONA THAN THE EAST DOES

They know more about Arizona cotton in Montana mining camps than they know about the whole state of Arizona in Boston, said to be one of the largest cotton markets in the United States. This is the conclusion reached at the chamber of commerce of two trips recently made by Arizona men in two different directions.

B. E. Marks came back from somewhere east to announce that people with whom he talked never had heard of the real Arizona; that the extent of knowledge of those with whom he talked was limited to such and vicious animals and things.

E. P. Taylor, director of the agricultural extension work of the University of Arizona, just home from Montana, said they knew more about Arizona cotton and agriculture there than he knows. That was in Montana mining camps where people are not required to know anything about crops. "They told me all about Pima cotton at Butte and Anaconda," said Mr. Taylor. "They even went so far as to analyze prices and comment upon the superior grade of cotton raised in Arizona. I had expected to hear Montana talk on Arizona mines in those mining cities, if they talked at all about Arizona, because the two states are the largest producers of copper in the country. But they supplied me with enough cotton information to run a fleet of gin houses for a year."

While in Montana Mr. Taylor conferred with officials of the Anaconda Copper Mining company, the great pioneer organization in Montana of Flood, Hearst-Marcus Daly interests. As a result he has accepted an official position in the phosphate department of the Anaconda and will be stationed at Chicago after July 1. He has been at the University of Arizona for four years and is known throughout the state for his rare ability in directing the extension work.

## ARMY CONVOY TO COME HERE WILL BE 3 MILES LONG

Full Schedule of Motor Train Due Here September 3 Received by Local Chamber of Commerce—Will Cross Continent

Full details and the official schedule of the army motor transport convoy, which will reach Phoenix September 3, were received from the adjutant general by the Phoenix chamber of commerce yesterday, the formal delivery being made by Sergeant Brady of the local army recruiting station.

The convoy left Washington June 14 on a trip which will take it south into Georgia and then west to Los Angeles. When the convoy arrives here September 3 it will have been on the road 71 days.

The convoy's transcontinental trip, according to the army schedule, is "the war department's contribution to the good roads movement, comparative service and operation test of various types of motorized vehicles, advantages and disadvantages of solid and pneumatic tires, recruiting for the motor transport corps and the army in general, and collecting road data relative to the character of surface, pavement, drainage, etc."

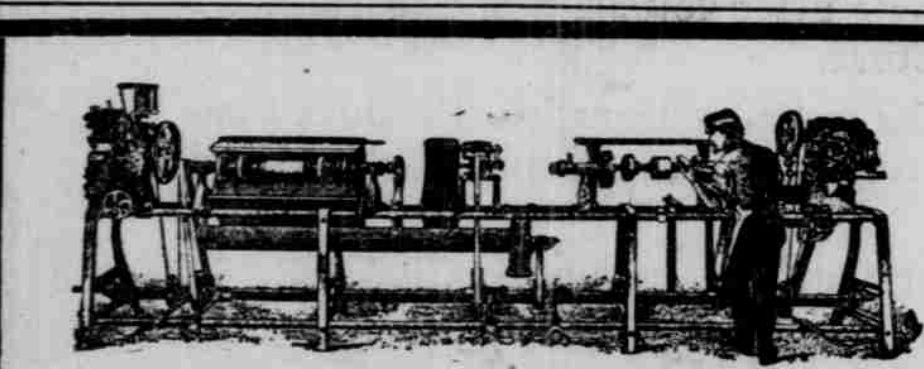

The equipment which will make up the big convoy, which on the road will be three miles in length, will consist of the following vehicles: 5 Dodge touring cars, 2 Cadillacs, 2 Dodge light delivery trucks, 7 White 1½-ton cargo trucks, 3 White tank trucks, 2 White 1½-ton machine shop trucks, 2 White staff observation cars, 8 Garfield 1½-ton cargo trucks, 8 Packard 1½-ton cargo trucks, 4 Standardized "P" cargo trucks, 2 P. W. D. cargo trucks, 1 G. M. C. ambulance, 1 kitchen trailer, 1 Cleveland tractor, 2 solo motorcycles. The personnel of the convoy will consist of one motor transport company at war strength, one service park unit at war strength, one headquarters motor command, one engineer detachment, one medical detachment, one signal corps detachment, the total personnel will be about 20 officers, including observers, and 160 men. Lieut. Col. John F. Franklin, F. A., will be in command.

The army motor convoy on its cross-country trip will traverse the route of the Bankhead National Highway through the southern and southwestern states. It will enter Arizona August 28 at a point near Rodeo, and will reach Douglas the same day. From there it will go to Bisbee, Benson, Tucson and Florence, and then to Phoenix, reaching here September 3. Leaving this city, it will go to Palo Verde, Agua Caliente and Yuma, arriving at that city September 9. The convoy will then go by way of El Centro and San Diego to Los Angeles, ending its long trip in the coast metropolis September 17.

Accompanying the government schedule received yesterday by the chamber of commerce was a map of the route to be followed, drawn especially for the convoy.

**DISAPPOINTED IN LOVE  
JUMPS IN THAMES**  
LONDON—"A headache, toothache and heartache" were the troubles of a war widow, she is said to have told a married man with whom she was infatuated. She begged him to elope with her and when he replied he didn't think he cared that much for her, she ended her life by jumping into the Thames.

Sir J. J. Thompson, scientist, says the atomic energy in an ounce of chlorine equals the work required to keep the Mauretania going at full speed for a week.

## The Ape Knew More Than His Keeper

If everyone took as good care of their teeth as this Ape did there would be far less illness in the world. He knew it should be attended to, but in his brute way he could think of nothing to do but pull it. He applied a prehistoric method of alleviating pain to a modern case.

Today it is possible to prevent many severe cases of illness by proper care and treatment of the teeth. An examination in my office costs you nothing. It may be the means of saving you untold misery and many dollars. Don't let the Ape be more up to date than you are. If he had known where there was a dentist he would probably have gone to one long before the tooth started aching.

APE PULLS TOOTH  
VIA THE BED POST  
LONDON—An orang-outang in a zoo here extracted his own tooth. The tooth had ached some days. The ape tied a string about it and being unable to dislodge it tied the string to the bedpost and traced his feet. The tooth was two inches long. The ape is happy again.
